Summary

Results-oriented Software Engineer with more than 3 years of experience architecting, developing and debugging consumer-focused websites using React.js, Node.js, JavaScript, Express, Postgres, Docker, Strapi, and CSS. Expertise includes responsive design, integration of third-party applications, and API development.

Skills

| | |
|-------------|--|
| Programming | React.js, Node.js, Express, Postgres, Docker |
| Tools | Jira, Bitbucket, Netlify, AWS, Strapi |
| Techniques | Troubleshooting, Deployment, Debugging, Leadership, Management |

Work Experience

- | | | |
|--|---------------------------------|-------------------------------|
| Archi's Academy, US | <i>Fullstack Developer</i> | <i>January 2021 - Present</i> |
| <ul style="list-style-type: none">- Work with an agile and cross-functional team responsible for the entire software development life cycle.- Architect and implement backend API's using- Convert prototyped designs to functional frontend solutions, dockerizing applications and services to appropriate containers.- Deploy applications to the cloud, release on a weekly basis and run the pipelines. | | |
| Axel Technologies, India | <i>Software Engineer</i> | <i>Oct 2017 – Dec 2020</i> |
| <ul style="list-style-type: none">- Design, develop, and deploy robust web applications using PHP, Laravel, jQuery, CSS, and HTML.- Create mobile applications that use responsive design for multiple screen resolutions.- Test applications to ensure that they meet client requirements for functionality, scalability, and performance.- Support, debug, and troubleshoot client projects, solving technical issues quickly and accurately. | | |
| Axel Technologies, India | <i>Software Engineer Intern</i> | <i>Aug 2017 – Sep 2017</i> |
| <ul style="list-style-type: none">- Developed front-end web applications using HTML, CSS Bootstrap, JavaScript, and jQuery and backend in core PHP and Laravel.- Designed and developed applications using the MVC pattern.. | | |

Projects

- Archi's Academy Website**
- Worked as a Fullstack developer responsible for developing new user-facing features and converting design wireframes into reusable code and delivering application features based on the sprint.
 - Designed the microservice architecture of the application along with the agile team.
 - Enhanced the code for maximum scalability by collaborating with the team members.
- Endurance**
- Lead the architecture and development of the Endurance hackathon website which is a single page web application for global participants who endures in software development to develop challenging web applications.
- HVAC Flat Rate Application**
- Worked as a critical member in a 15 person team to design and develop a mobile application for heating and air conditioning contractors using PHP, Lumen, HTML, CSS, jQuery, and Bootstrap.
 - Developed modules with Laravel, and integrated third-party softwares like QuickBooks Online and QuickBooks Desktop.
 - Created API using Lumen and developed core PHP modules to enhance the product's performance.

Education

B.E. in Computer Science & Engineering
Anna University, Coimbatore, India

2013 - 2017
